## **Announcement Regarding Holding Company's Acquisition of Koken Chemical Company Limited**

We hereby announce that on April 27, 2017, our holding company, United Precision Technologies Co., Ltd. (UPT), acquired the whole stock of Koken Chemical Company Limited, a competitor to us in photoetching process industry.

As a result of this acquisition, the UPT Group is expected to become one of the largest players in the photoetching industry.

Koken's core competencies lie in photoetching, but Koken is stronger than us in such areas as thicker sheet metal processing and the supply of products utilizing diffusion bonding (thermos-compression) technology. Our mutually complementary relationship can be expected to further promote our company's "ETCHING + ONE" strategy.

Kyosei and Koken will aim for further growth by realizing of synergies.

\*UPT is a portfolio company in the funds served by Advantage Partners. On the occasion of this acquisition, it has changed its company name from AP48 Co., Ltd.
